San Antonio, TX 78283-3966

Dear Mr. Ramos:

This letter is to serve in response to the letter dated January 17, 2003 from Emil Moncivais, regarding the types and level of service provided during calendar year 2002 to certain proposed annexations areas.

All areas listed in the proposed annexation plan are located in SAWS water service area except Oliver Ranch, and the Southside initiative No's 1,2, and a portion of 3. Water service to these areas is provided by Bexar Metropolitan Water District.

Wastewater service is available in all areas except the Southside initiative area. There are currently no wastewater lines located in the area. Water and wastewater services are available to SAWS customers through the Utility Service Regulations.

Existing infrastructure for water and wastewater service in the areas served by SAWS is less than 10 years of age. There have been no maintenance issues and it is anticipated that replacement would not be expected for another 30 to 40 years.

Attached are utility maps for each of the areas that SAWS serves, depicting the location of water and wastewater mains in the SAWS inventory.

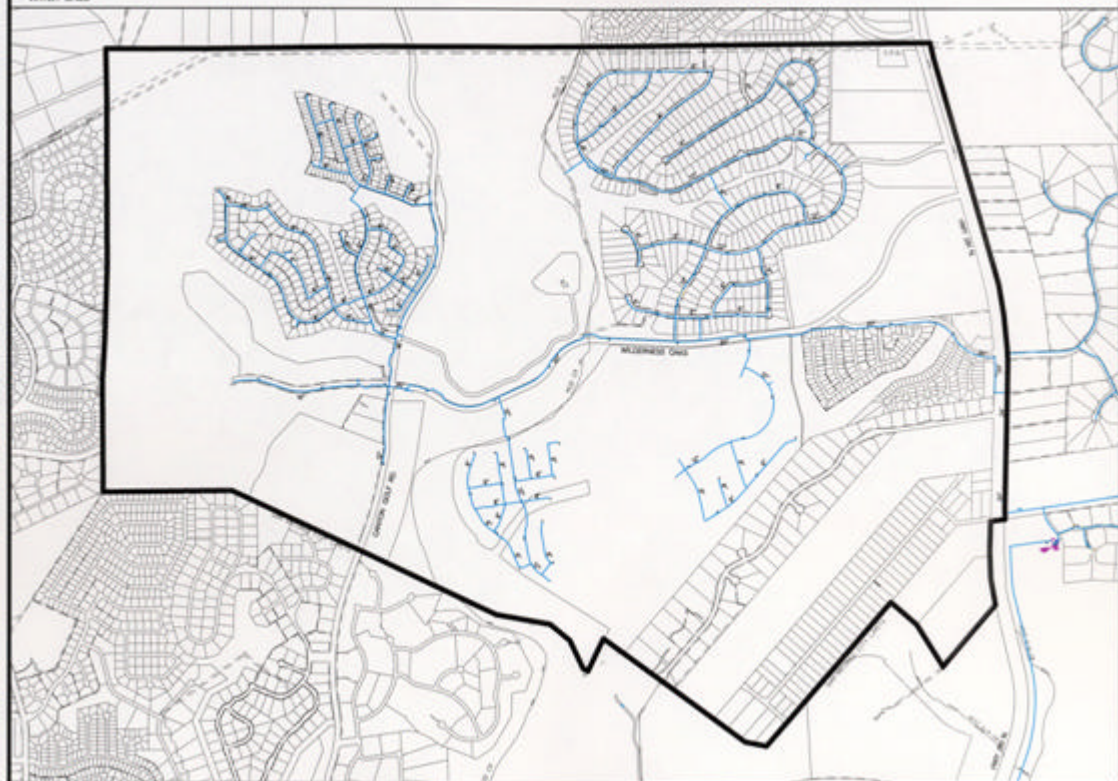

If you have any questions regarding the information, you can contact me at 704-7173 or by e-mail at drrathburn@saws.org or David Lugo at 704-1895 or by e-mail at dlugo@saws.org.

Sincerely,

Dwayne Rathburn
Manager, Program Planning
Infrastructure Development
